

Technical Handbook Order Form

The Technical Handbook has been prepared by the Technical Committee of the Trussed Rafter Association who gratefully acknowledge the assistance of the following organisations:

- Building Research Establishment
- Timber Research and Development Association
- National Standards Authority of Ireland

The Handbook covers all aspects of Trussed Rafter roof design in a user-friendly way, comprising 36 pages of advice and detailed drawings in full colour.

Full details are given for standard bracing situations and for more complex designs. Details of trimming around openings and obstacles are given along with sizes of members etc.

The Handbook contains a very useful Construction Check List for the site inspector giving a tick list for various elements of the roof construction, together with guidance on bolting, nailing and other forms of fixing.

The Technical Handbook is priced at £15 (including postage & packing) - remittance with order please!

Order Form

Please send me copies of the Technical Handbook @ £15 per copy.

I enclose my remittance of £..... (inc. p & p)
